Library in Thompson Named in Honour of Two NCN Elders

The newly named

facility honours

two NCN elders

for their dedication

and commitment to

Indigenous Culture

and community

The Wellington and Madeleine Spence Memorial Library naming ceremony took place at the University College of

the North campus in Thompson on August 25, 2016. The newly named facility honours two NCN elders for their dedication and commitment to Indigenous Culture and community involvement.

Councillor Bonnie

Linklater spoke at the event on behalf of NCN Government to honour the two NCN Elders. MLA Kelly

Bindle was also in attendance along with many UCN council of elders, delegates,

UCN council and staff, friends and family of the Spences.

involvement.

The campus, with roc with the Spence of the entry of the Spences.

The event was well-attended and it was a meaningful and fitting dedication to Wellington and Madeleine Spence,

both respected members of the UCN council of elders who travelled through Western Canada and the United States while promoting aboriginal cultural awareness. They worked hard throughout their lives and raised a large family in the north.

The library, located in the UCN campus, now features a large wall with rock and mortar and sign lettering with the Wellington and Madeline Spence name proudly displayed at the entrance.

The library features a large wall with the Wellington and Madeline Spence name proudly displayed at the entrance. Several NCN Citizens participated in the naming event.

Memorial Library located inside University College of the North campus.

Bouncing Bubble Fun

NCN youth and organizers take part in a fun match of bubble soccer.

Tansi Nitotemitik,
This month has been extremely
busy for me with work related
issues and personally. My wife and
I just celebrated our 25th wedding
anniversary and it was great to see
so many from NCN at the event. I
would like to thank my wife for always
being there for me and supporting
me during my tenure as Chief. It is
impossible to be in politics without
the support of your family and I am
thankful for my family everyday.

It is once again a pleasure to give you an update on some of the issues and projects that my Council and I have been working on in the last few weeks. As mentioned, the last few weeks have been extremely busy for us as we prepare to celebrate the official conversion of our Mystery Lake property in Thompson to an Urban Reserve. This is probably one of the most significant and most crucial achievements our Nation has ever completed for our community and one that will have the greatest economic impact for our Nation for many generations to come. This conversion is only the beginning of many other businesses that will be part of the next phase of development in our Mystery Lake property. We will do our due diligence to ensure that any project that is considered will maximize the benefits for our Nation similar to what we did for the Casino project.

Casino Update

I thought it would be good to provide the community with a brief update on our exploration of a possible casino opportunity for Thompson. As some of you are aware, there has been an ongoing discussion about the prospect of developing a First Nations gaming facility to serve northern Manitoba. The First Nations were allocated up to five licenses several years ago, and to date we have seen three casino developments come to fruition; South Beach, Aseneskak and Sand Hills.

As with all projects of this type it is important to undertake research and study the feasibility to determine whether the market can support an enterprise of this type. We had embarked on this in partnership

with the Keewatin Tribal Council and sought out expertise to gather the necessary information, conduct an analysis and develop a position on the potential. In doing so, we used MNP LLP as they have undertaken this type of work for many other Aboriginal interests across Canada. In addition, we also solicited input from the Saskatchewan Indian Gaming Authority as they have tremendous knowledge in operating Casinos in similar types of markets.

There are many factors that must be considered in this type of market review and this included population and growth, capital costs, gaming trends, operating costs, competition and a host of relevant information to allow us to make an informed decision. There seems to be a misunderstanding that all casinos are profitable so they are always successful. This is simply not the case. Many examples exist in this province and elsewhere in Canada and the United States where this is not the case.

Having looked at all of the necessary data we have determined that the "stars do not line up" and that this market cannot support a casino. The market saturation, the debt, potential management costs, the staffing requirements and many other conditions exist that do not provide confidence or lend themselves to this being a profitable venture. The economic environment is not positive at this time, as evidenced by our studies and the recent announcement by the Aseneskak Casino, that they will close down, and seek another market to operate in. During this down turn in the business cycle, we will continue to monitor the economic conditions for a casino in the Thompson region, and reevaluate the casino in the future - including the terms and conditions of the license. With that said, we do believe that there is room for a more enhanced gaming experience that can be very profitable and lend itself to other entertainment opportunities. As our community already has existing facilities, and our urban lands have more recently been converted to Reserve lands, there is a lot of potential for more economic growth and this will include maximizing our gaming opportunity.

This journey began with the partnership of many of our First Nation neighbours, family and friends. As we continue to define the future of

growing our gaming options, we want to make every effort to include other communities and see how they might be able to participate and share in this exciting future prospect.

"Coming together is a beginning; Keeping together is progress; Working together is success."

Henry Ford, Founder of the Ford Motor Company

High School Update (this was also aired on our local radio station) I hope everyone had a great summer and had a chance to spend quality time with family and friends. Now that fall is here, it means that our kids are back in school and are getting ready for another year of learning and development in skills that will promote their self-identity, language and culture, all of which are critical for their self-esteem.

Our Council and Education Authority all agree that education is a treaty right! We also agree that how we learn and promote our language, culture and Nehetho traditions are the key to our future. We must all take on the responsibility to do what it takes to support our children, to make sure that they succeed. Our Nation and that of our children's future is in our hands.

As you know, our high school is currently not structurally sound and is not safe for occupancy. We have a commitment from the Department of Indigenous Affairs to secure facilities in the next few months.

We have retained engineering services and expertise to assist in the structural work to ensure that the building can be brought up to a safe standard so it will remain safe for occupancy until we can build a new school.

We have recently met with the RDG of INAC to discuss the provision of funding for a temporary school and the construction of a new school. He advised us that they will be providing NCN with funding to do a feasibility study for temporary classrooms and a new school.

The RDG has cautioned that while statistics indicate that we have a large eligible school age population, the study will confirm that current nominal roll and historical school attendance rates do not support funding for a new school.

In order for Nisichawayasihk to qualify for additional space and justify the needs for a new school, it is important that parents and guardians help to get all eligible school-aged learners to attend school on a regular basis. By doing so, it will help is build the case for additional space and new facilities.

We currently have an enrolment count that indicates that about 25% of the eligible school-aged population are not attending school. This amounts to over 200 eligible students that are currently not attending any classes and we are not getting the funding that comes with attendance. It also means that unless we change this immediately we will be condemning these kids to poverty forever as they will not have the education and skills that are so necessary in today's world.

We need your help to make sure that all eligible children are attending school. With increased school attendance, we can easily justify a new school but we need your help. This effort will require a daily, weekly and yes, year-round commitment.

We all agree that this treaty right is a shared responsibility. Simply saying that you have an education right and not use it means nothing! There are really two sets of 3 R's that are essential for all of us to remember. These are the traditional 3 R's of reading, writing, arithmetic (literacy skills) as well as the 3 R's of respect, responsibility and reconciliation. As a community we need to show our kids how to achieve both by being strong role models.

So, as our Council and Education Authority agree that education is an important enabler for our future as parents and guardians, we must work together to make sure our children attend school regularly. Doing so is a testament to knowing the meaning of that treaty right – one that will result in getting that new school and much needed supports to enhance the future of the Nisichawayasi Nehethowuk.

Women's Shelter

This is to advise members that we submitted an Expression of Interest (EOI) to CMHC for the construction of a women's shelter in our community. I'm hopeful that we get funded for this most important initiative for our community and region. But, we also need to start addressing the underlying causes of violence in our community as it affects not only women and children but all of us.

NCN Store

Our brand new 10,000 square foot store should be opening up by early October. This is another major achievement for our Nation as we continue to seek economic sovereignty and prosperity. We also plan to have a grand opening soon to celebrate another great achievement for our community and people.

Violence in our Community

As you have heard, violence in our community is troublesome and totally unacceptable. We all must do our part as NCN citizens to end this violence that we have been subjected to lately before someone else gets badly injured or killed. It seems as though, our respect for each other is lost and our ways are gone by the wayside. We need to forgive each other and move on and to live in harmony together before its too late. Violence has a huge social cost and has a negative impact on our community. Violence must end and it has to stop with each individual. I'm asking you kindly to end violence, please. As a community we must come together and determine why we have this violence in our community. No-one deserves to be afraid living in our community. Ekosi.

Chief Marcel Moody
Nisichawayasihk Cree Nation

NCN and City of Thompson Set to Celebrate Mystery Lake Urban Reserve

Nisichawayasihk Cree Nation Chief Marcel Moody and City of Thompson Mayor Dennis Fenske announced today that there will be a celebration of the establishment of the new urban reserve in Thompson. After almost fifteen years, the process for conversion was finally completed earlier this summer when the Minister of Indigenous Affairs and Northern Development (Canada) set aside the Mystery Lake lands as an urban reserve within the geographical boundaries of the City of Thompson.

Chief Moody noted that the Nisichawayasi Nehetho have lived, worked and played for thousands of years on the lands which form part of the Mystery Lake Hotel and have long been involved in the economic life of Thompson and the surrounding community. He went on to say, "the celebration

on September 28 provides an opportunity for us to acknowledge the significance of this historic milestone for our Nation and the citizens of Thompson. Our dream is to develop state of the art facilities that will add to our Nation's revenue base, showcase our culture and the spirit and endurance of people living in the north."

"This celebration will provide an opportunity to clearly demonstrate how cooperation and mutual respect can benefit all Citizens – Indigenous and non-Indigenous," stated Mayor Fenske.

Mayor Fenske reinforced the importance of this celebration by stating: "This celebration will provide an opportunity to clearly demonstrate how co-operation and mutual respect can benefit all Citizens – Indigenous and non-Indigenous. This is reconciliation in action and we look forward to collaborating further with NCN as this development opportunity takes shape."

NCN resolved many outstanding hydro development issues in 1996 when NCN Citizens voted in support of signing the NFA Implementation Agreement. Proceeds were invested in Nisichawayasihk Trust and were used to purchase the Mystery Lake Hotel in 1998. NCN has used that agreement as a springboard for further economic development

initiatives such as NCN's ownership interests in the Thompson Family Foods and the Wuskwatim Project Limited Partnership and partnership arrangements between the Atoskiwin Education and Training Centre of Excellence (ATEC), VALE and University College of the North (UCN).

NCN Citizens Invited to Historic Celebration

On behalf of the Nisichawayasihk Cree Nation Chief and Council, NCN Citizens are invited to attend the Mystery Lake Property Official Urban Reserve Community Celebration.

The event will be held on Wednesday, September 28, 2016 at 1:00 p.m. at the Mystery Lake Motor Hotel, 58 Cree Road in Thompson. The celebration will include a presentation

ceremony followed by entertainment and a feast.

NCN asks that members join together in marking this historic occasion and to celebrate this moment.

On May 20, 2016 it was officially announced that the Addition to Reserve of 4.21 acres of land at Mystery Lake Hotel Complex was complete. This provided NCN the ability to administer and manage the lands where the hotel is located in Thompson. The Minister of Indigenous and Northern

Affairs set apart the Mystery Lake lands as NCN reserve lands in accordance with the federal government's Additions to Reserve policies. The land is located within NCN's traditional territory. It currently consists of the NCN-owned Hotel, Trappers Tavern, and two vacant lots.

For more information or

Moose Population Huge Concern

Conservation officers, government officials, legislative bodies, Elders and hunters across the province and locally in NCN are sounding the alarm over moose populations.

In fact, moose experts from 12 countries gathered in Brandon last month for the 50th Annual Moose Conference and Workshop (also the 8th Annual International Moose Symposium) to assess the situation and discuss solutions to slow the problem before it becomes a tragedy.

The provincial government has responded to the crisis by cancelling moose hunting entirely in Game Hunting Areas 12, 13, 13A, 14, 14A, 18, 18A, 18B, 18C, 19A, 26, 29 and 29A. This cancellation includes First Nations and Metis hunters.

Many Factors Effect Moose

Experts say there are many factors involved. Disease, such as bovine tuberculosis and chronic wasting disease, are becoming a larger problem for moose. They are particularly affected by winter tick and brain worm, which all Manitoba deer carry, but is fatal for moose. Warmer and shorter winters mean the deer tick especially has more time to affect more of the moose population.

Moose habitat is constantly under threat as well, not only losing land base to development, but also due to increased roads, more

Improving moose harvesting management is an option being explored as a solutions to the declining population.

traffic, and more recreational vehicles able to off-road.

But many Elders, locals and officials say the real problem is only available poor harvesting practices and non-traditional hunting methods.

"Efficient processing

Better Moose Harvest Management Required

"Efficient processing is important. If you are new to moose hunting, take the Hunter Education Course. Ask an Elder to teach you how to properly butcher without waste," says NCN Councillor Ron Spence. "And remember that moose meat is for personal consumption, and for sharing with First Nations friends and family. Under no circumstances is it to be sold."

Spotlighting, in which hunters flood an area with light during the night to startle moose and flush them out, is a dangerous technique that has caused rapid decline in moose populations around the province. It's also extremely dangerous for fellow hunters and the public. So is shooting from within a vehicle, which is illegal and a disastrous practice for a healthy population.

Provincial wildlife management budgets have been slashed over the years, which means big game data is not current or reliable. Experts have called upon conservation offices to conduct surveys around the province so that there is a true understanding of how healthy (or dire) the moose population is. While this disclosure is not required of status Indian hunters, Elders say First Nations should offer up their knowledge too.

NCN Chief and Council Call for Immediate Action

NCN Chief and Council remind Citizens that everyone must respond to the declining moose population, and act accordingly before it is too late.

"It's really important to encourage each other to be good respectful hunters. If your friends want to go out at night, or get more than they can use, we have to speak up about that. Using dishonest practices without respect for these creatures isn't fun. We need to get back to our traditions and appreciate the cultural aspect of hunting," says Spence.

While status Indian hunters do not require licenses, and are not restricted to specific seasons, equipment or bag limits, they still have a moral obligation to harvest moose responsibly and should use the government's crackdown as a guideline. For example, moose hunting in GHAs 6a, 9a, 10, 11, 15, 15a and 21a is only available to hunters who purchase a special Conservation

Moose License package. This suggests the moose population in these GHAs is under threat and status Indian hunters should consider also not hunting in these areas.

First Nations to Respect Harvest for Future Generations

In fact, some say that having no restrictions means First Nations people are entirely responsible for the health of the moose population.

"Hopefully our hunters can make the right decision so Council doesn't have to make official rules to govern everyone. It's up to every one of us to ensure there will always be a moose population to enjoy," Spence says.

"The moose hunt was an essential part of survival for generations past, and it's an important tradition for us now. We have to make sure it is available for our future generations, too."

is important. If you are new to moose hunting, take the Hunter Education Course. Ask an Elder to teach you how to properly butcher without waste."

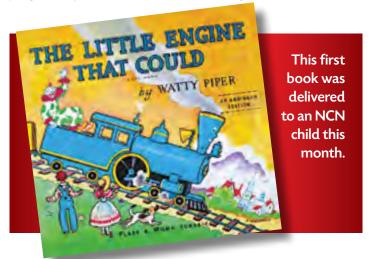

Dolly Parton Literacy Program Delivers Books to NCN Kids

A Country music legend and superstar is making her mark in Nisichawayasihk Cree Nation. A literacy program led by Dolly Parton the iconic star and one of the world's most well-known singers has come to homes in Nelson House.

Natalie Tays, Principal at OK school is excited about the program. "Our community received its first book from the Dolly Parton Foundation. New books will provide better literacy tools for our young children."

In addition to Nelson House, Parton's Imagination Library program expansion was announced in Peguis First Nation. The

program mails age-appropriate books directly to kid's homes each month. Children can signed up as newborns and receive books up to the age of five.

"I'm just delighted that the good people in Manitoba have launched the program in First Nations," Parton said in a prepared statement. Thanks to sponsors, champions and volunteers close to 10,000 children in Manitoba will be able to build a library of books. The hope is to immerse children and communities in the magic of reading. Dolly added, "I'm incredibly proud that the Imagination Library program will be helping on-reserve children to learn more and dream more."

The country music superstar performed in Winnipeg at the MTS Centre on September 12,

This donation of books in Manitoba is supported by Manitoba First Nations Education Resource Centre (MFNERC), Frontier School Division, Winnipeg Foundation, Manitoba Community Services, Aseneskak Casino, Healthy Child Manitoba and the RBC Foundation.

"I'm incredibly proud that the Imagination Library program will be helping on-reserve children to learn more and dream more," stated country music legend Dolly Parton.

Help Protect Your Home from Rodents this Winter

The cold temperatures are settling in for the winter months, and if you're not careful, rodents can also settle into your home. Your house – especially your kitchen – offers everything rats and mice are looking for: food, water and warmth.

Rodents like mice and rats are disease-transmitters and cause huge problems structurally. They've been known to cause fires by gnawing through electrical wires.

Rodents are a triple threat to homeowners because they can contaminate food, destroy property and spread serious diseases, including Hantavirus and LCMV, a viral disease that can cause inflammation of the brain (encephalitis). They can spread these diseases through their urine and feces or directly through bites. Fleas, lice and ticks can also be brought into your home by rodents and can carry infection to humans after feeding on other infected mice or rats.

It's easier than you think for a rodent to get into your home. A rat can fit through an opening as small as a quarter, while a mouse can squeeze through a hole smaller than a dime.

It's important to get your home ready before pests colonize in attics, burrows, under concrete and porches, in walls and other hard to reach places.

The following tips can help prevent rodents from getting into your home this winter:

- Seal all cracks and install weather strips at the bottom of
- Trim branches, plants and bushes that hang over the home.
- Remove bales and shrubs near the house.
- Keep the interior of the home clean and free of food sources.
- Store all food, including pet food, and garbage properly in sealed
- Do not leave dishes in the sink or pet food out overnight.
- Fill small holes with steel wool or materials rodents can not chew through.
- Keep doors closed to prevent rodents from walking right in.
- Clean up clutter.
- Keep garbage and garbage barrels far from the house.
- Consider a pet. Cats and dogs are often great at keeping

Free NCN Gym Membership Program Renewed

McDole's Gym in Winnipeg is committed to your health and wellness! The co-owners, Chris McDole and Dave Beakley, are happy to announce they've renewed their offer of free gym memberships to all NCN Citizens.

"It's a no-brainer for us," says Beakley, who's also head strength coach. "Over the last eight years, Chris and I have built a number of great relationships, professionally and personally, and it's a priority for us to continue."

Beakley says every week about 15 to 20 NCN Citizens are in the gym at 181 Stradbrook Avenue. He says it's great to see people of all ages understanding the benefits of regular exercise, including heart health, a healthy weight, improved levels of confidence and self-worth, and an overall sense of well-being. He says it's especially important for First Nations people to prioritize their fitness.

"Because of the high incidence of diabetes, regular exercise and better knowledge of nutrition can help regulate blood sugars and fight off unnecessary health issues."

Dave Beakley and Chris McDole have been friends

McDole's Gym, in partnership with NCN Chief and Council, is once again offering free memberships in Winnipeg.

FIREARMS STORAGE

Be safe and prevent frearms accidents. UNLOAD IT, LOCK IT & STORE IT

Be Smart. Be Safe.

and supporters of NCN for about eight years. From free memberships, jointly offered in partnership with NCN Chief and Council at their Winnipeg gym, to providing new equipment at the NCN fitness facilities, to programs for women and youth, they are excited to witness the evolution of health and wellness.

Their latest initiative was a two-day strongman competition at the Family and Community Wellness Centre.

"We had a great turnout and kids aged 8 to 17 participated," says Beakley. "I always love watching the competitive spirit they've got, and win or lose, the proud Their latest initiative was a two-day strongman competition at the Family and Community Wellness Centre.

look and sense of achievement they get from just competing."

McDole's is an independent gym with a small staff and regular clientele, which creates a great sense of community. Whether you're a competitive lifter with an established workout or a newbie who's never been in a gym, there's a coach and a program for you. While many people may feel unsure or intimidated, Beakley says you'll soon feel right at home.

"We are always teaching and coaching, so anyone who comes down is never lost. There will always be a friendly face and helpful hand there for you."

To enjoy your free membership, Beakley says you should call before your first visit to ensure someone will be available for paperwork. Just call 204-453-3935 and bring your treaty card to register.

Totem Pole Journey Reaches Manitoba

NCN Citizens Attend Emotional Event

On September 5, a seven-metre-high totem pole reached Winnipeg after weeks of travel that started 5,000 miles west, at Lummi Nation in the state of Washington. The totem is a gift to Treaty One residents in Manitoba, and will be raised at Turtle Lodge in Sakgeeng First Nation.

The totem pole is the fourth of a series of gifts from the Coastal Salish people to raise alliance and awareness with other First Nations. Created by renowned carver Jewell James, the totem pole travelled through Idaho, Montana, British Columbia, Alberta, South Dakota and North Dakota on its journey.

The totem's travels received further attention thanks to hundreds of people who joined its journey in Manitoba, including NCN Citizens Elder D'Arcy Linklater and Hilda Anderson-Pryz, who called the event "significant and emotional."

The procession made stops at Oodena Circle at the Forks and Thunderbird House on Main Street, where discussions among leaders and community members focused on environmental issues such as pipeline development, water sources, and keeping the pressure on the federal and provincial governments.

"We're asking them to work with First Nations to protect the water supply," master carver James told the CBC. "I think we're all looking for that connection, that common goal that all

The seven-metre-high totem pole is the fourth of a series of gifts from the Coastal Salish people to raise alliance and awareness with other First Nations.

of us know, that we have to work together."

James said the design of the totem was gifted to him through ceremony and visions. He has said, "the medicine woman shows a connection to the Great Spirit; the eagle symbolizes wisdom and vision; the wolf is a scout or guide; and the bear provides strength."

Elders and leaders were hopeful that First Nations people, and those who are concerned about the environment, would see the Totem Pole Journey as a chance to get involved and collaborate "in the name of our shared responsibilities to Nimama Akii, Mother Earth."

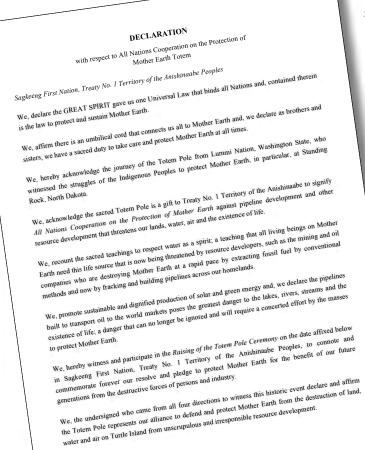

The totem pole made several stops on its journey east to offer strength to Indigenous protests, including Sacred Stone Camp in North Dakota, where the Standing Rock Sioux Tribe is standing up to the Dakota Access pipeline. Their concern over safe water access and ancient burial grounds is gaining attention and momentum, with more than

100 tribes now sharing resources and peacefully protesting.

Here at home, Assembly of Manitoba Chiefs Grand Chief Derek Nepinak attended the arrival and told the CBC it was an honour to receive the totem pole from the Lummi Nation.

> "This is a very significant moment in our modern society

when the original nations of people from all over Turtle Island are forming alliance, and we're taking a stand against further exploration of the ancestral homelands," Nepinak told the CBC. "I believe that what future energy developments [are] based upon is the consent of the people. Consent can't be manufactured or built through political structures or Indian Act governments; it's got to be done by the people, for the people."

Wally Swain, Kessekoowenis Ojibway Nation; D'Arcy Linklater, NCN and Elder Dave Courchene, Sagkeeng First Nation.

NNCEA Announces New Education Director and Plans for 2016-17

In the past year, there have been extensive changes in the Nisichawaysihk educational system. Since the fall of 2015, the educational organization has a new educational bylaw, a new name, a new School Board and now a new educational leader. It is anticipated that all these changes will have a positive, far-lasting effect.

New Education Director Starts School Year

As of September 6th, 2016, the new Director of Education for the Nisichawayasi Nehetho Culture and Education Authority Inc. (NNCEA) is a local band member, L. Gail Gossfeld-McDonald, who possesses a bachelor and masters degree in education. She is no stranger to the north, Nisichawayasihk, "local control" or the First Nations Control of First Nations Education (FNCFNE) system at Nisichawayasihk and is well versed in the First Nation educational circles in the province.

"It's a brand new school year with new direction and we are optimistic it will be the best ever with even more successful graduates," says Gossfeld-McDonald.

Ms. Gossfeld-McDonald has had an array of experiences, which have prepared her for this time. Since graduating in 1982 from the University of Manitoba at the Winnipeg Education Centre, she's been a teacher/administrator at all levels in various school divisions, a School Board Trustee, a Band Councillor and served on several other community Boards.

She's learned to balance family, home and work. The new "down to earth" iskwe (woman) Director is the seventh educational leader for the education Authority in NCN.

Gail has been affiliated with the NNCEA education system since 1982 and the various educational issues surrounding the Cree Nation. Gail also recognizes the immediate challenges "It's a brand new school year with new direction and we are optimistic it will be the best ever with even more successful graduates," says Gossfeld-McDonald.

facing NCN schools. "There have been many obstacles we must overcome and immediate concerns that must be addressed."

replacement of the fire alarm panel. Funding, installation times and testing of the unit has delayed the opening of the school until Monday, September 26, 2016.

Another challenge facing the Board includes bridging the gap between funding supports for NCN students and those for other schools in Manitoba. Inadequate funding restricts what can be done in First Nations Schools. As it is, federal First Nation schools get approximately \$5,400 per student while Manitoba provincial school rates, per student, are much higher. Nominal roll is taken on a yearly basis and the tally is taken on September 30th. Students not registered or attending school regularly by this date risk the educational funding dollars being lost for the entire year.

Important Message for Students to Attend Classes

Gail wishes to inform parents and guardians, "it is important for our members to know, if your child is not registered and in school on Sept. 30th, and attending regularly, educational funding dollars for your child are lost. When school is open, it is vital to send your child(ren). Student attendance is too low. Parents need to get their children to school on time daily."

The new Director of Education for the NNCEA is a local band member, L. Gail Gossfeld-McDonald.

Funding for Schools is a Top Priority

Lack of funding for all needed programs and space required for the ever-increasing number of attending students is critical. The design of the school has funding and functionality concerns and must be fixed. We must seek funding from INAC and other sources to provide a new high school while making the existing school safe and operational for students and staff. We must also ensure NNCEA policies and procedures are up to date.

The existing facility, which is 30 years old, has aged quickly. Major repairs are needed to ensure workplace health and safety standards. The school had to be closed on September 7th, 2016 due to a

When school is open, it is vital to send your child(ren). It is crucial for students to attend school daily and be on time. The prevention/reduction of school closures in our system has to happen.

Events

NCN to Host High School Zones and Provincial Cross Country Meet

"We're the only

school hosting a

provincials in the

North for the

next six years. Our

students and staff

are very excited."

Nisichawayasihk Neyo Ohtinwak Collegiate is preparing for some of Manitoba's most disciplined and elite high school athletes. The high

school will host the zone cross country meet on October 3, 2016 at which about 200 runners will compete, including 20 grade 9 to 12 NNOC athletes.

Three different running events will take place: junior varsity (JV) girls run a 3,000 metre route, JV boys and senior girls run a 4,000 metre race and the senior boys compete in the 5,000 metres.

"Students will leave Moore's Bay and head toward Industries. From there, they

will head toward the lagoon to a turn around point," says NNOC viceprincipal David MacDonald. "Runners will return on the same route but on the way back they run through the path from Moore's Bay to ATEC and finish at the school."

All athletes who complete the event are eligible to run in the provincial high school cross country meet, which NNOC will host on October 12. Between 1,000 and 1,600 high school students are expected to compete.

"Last year there were 40 school buses and another 40 tour buses

Nisichawayasihk Neyo Ohtinwak Collegiate will host the zone cross country meet on October 3, 2016, and the provincial high school cross country championships on October 12, 2016.

at the meet," says MacDonald, who is also chairman of this year's meet. "Nelson House has never hosted this event, and as far as I know we've never hosted a provincial competition in any school sport. We're the only school hosting a provincials in the North for the next six years. Our students and staff are very excited."

The vice-principal says he hopes the entire community will get involved in the provincial meet. In fact, the success of the event depends upon everyone's participation.

"Nelson House is a fantastic place and it is time for the rest of the province to get a glimpse of true Nelson House hospitality. We are excited to show off the Nation."

For the event to run smoothly, the high school is hoping for 250 volunteers, and encourages local businesses to donate their employees' time to pitch in on October 12.

"The support thus far has been overwhelming. Community members are getting involved as they become aware of the opportunity here," he says. "I truly believe that this is a once in a very long time type of event. We want to make our community shine and I know we will."

All types of volunteer shifts are up for grabs. Greeters, canteen workers, marshalls, scorers, first aid attendants and security workers are just some of the jobs that Citizens can sign up for.

If you'd like to help host Manitoba's finest athletes, look for sign-up sheets around town. You can also call 204-679-3711 or email davidm@nhea.info.

Edna Moose

South Indian Lake

Edna was born in the community of Nelson House in 1915. The youngest of 6 sisters, she was well liked because of her ability to defuse a situation with a touch of humour. In Nelson House she learned survival skills such as how to trap animals, prepare hides and sew clothing. This ability would serve her well when raising her own family.

While still in her teens, Edna married a non-Aboriginal fellow named, Mourdo, and they moved north approximately 100 kilometres, to the newly developing community of South Indian Lake. During this period, native women marrying non-Aboriginal

men lost their treaty status and could not remain on the reserve. It was prevalent then for these couples to move from Nelson House to South Indian Lake. As such the two communities have retained a common thread over the years as some relatives moved and others remained behind.

Edna's family grew steadily as three children were born. They were taught that hard work was needed to succeed in life but also that a sense of humour can ease life's burdens. After her husband died at an early age, she lived with her sister, Anna Mcleod, for several years.

NCN Land Code Update – Workshops Gather Positive Input

On August 11-12, 2016 (Winnipeg) and August 17-18, 2016 (NCN), the NCN Land Code Development Committee gathered with NCN Citizens in Winnipeg and Nelson House to discuss development of NCN's Land Code, create general Lands governance awareness and identify environmental issues (ex. contaminated sites on reserve) left by Canada prior to ratifying the land code and Individual agreement. The workshops was an update on the progress of the Land Code that will replace the land management provisions of the Indian Act. The Committee encouraged members to raise their concerns and answered questions from NCN Citizens that attended the meetings. The goals of the workshop were to create:

- Environmental awareness for participants from Nisichawayasihk Cree Nation
- General Awareness of Land Management and Nisichawayasihk Cree Nation participation in FNLM FA/Land Code
- Awareness of environmental aspects of FNLM FA/Land Code
- A better understanding of what Environmental issues are of concern to the community.

As a result of work to date and the workshops, Committee Chair Bill Yetman said he was pleased, "We are making great progress. The Land Code Development Committee has had ten meetings to date. It has developed a draft Land Code, as well as Terms of Reference for the committee and a communications strategy." Committee meetings are held the last Thursday of every month.

The Development Committee is composed of 7 members. They are: Chair Bill Yetman, Councillor(s) Ron Spence and Willie Moore, D'Arcy Linklater Sr., Roslyn Moore, Cheyenne Spence, and Colleen Hunter.

D'Arcy Linklater speaks at workshop.

various locations throughout the Resource Area, including the newest addition to our reserve, the Mystery Lake Hotel Property in Thompson. "We intend on selecting more land, and creating new reserve lands around Thompson to take advantage of the Thompson market opportunities such as cottaging or campgrounds," said Yetman. The Lands Department will conduct community engagement in the near future to review existing land selections and get feedback on areas the members think we should select as TLE lands.

Ensuring Land Under Land Code has Environmental Site Assessments (ESA)

A major purpose of the meetings was to explain the Environmental Site Assessment (ESA) process, which is an essential component of the First Nation Land Management Framework Agreement and Land Code process, particularly under the Individual Agreement. This included a presentation by senior environment officer Tebesi Mosala from Indigenous

Environmental Site Assessment is an essential component of the Land Code process.

and Northern Affairs Canada (INAC) who explained the ESA process and indicated that ESAs are important to identify land that may be contaminated. Members were encouraged to identify issues or areas of environmental contamination (APECs) at the workshops, and a mapping exercise was used

Land Code Development Committee.

Highlights of the Workshop Meetings

During the meetings, TLE
Coordinator Terry Linklater
discussed the outstanding
Treaty Land Entitlement (TLE)
claim. He indicated that TLE is
a land claim that allows NCN
to select land (new reserve
land) anywhere in our Treaty
or Traditional Territory for
different purposes such as
economic development,
cultural significance or
special management. NCN
currently has 18 reserves in

Chief Moody, Councillor Moose and Moore with Land Advisory Board Chair - Chief Robert Louie (Westbank First Nation, BC) and Land Advisory Board Director Paul Chief

to create a list of issues that were identified by people who attended the workshops.

ESA's are an important step, under the Individual Agreement, to determine what INAC is liable for prior to taking over the Governance of our Lands. After issues have been identified under an ESA Phase 1, INAC has an obligation to conduct further investigations on contaminated Land to the point of remediation (clean up) where ever required. NCN also has the option of excluding a specific portion of the reserve land from its Land Code until the concern is sufficiently solved by Canada.

There are a number of phases under an ESA. Phase One includes a review of historical records, interviews, site visits and a report with recommendations for areas that may be contaminated, including recommendation for further investigation such as ESA Phase 2 and 3. ESA Phase two and three include further investigations such as sampling, and determining if remediation work is required.

Ed Vystrcil from the NCN Lands Department provided several examples of NCN lands that may need to be assessed including the Forest Industries yard, the Medicine Lodge, the lagoon, and the garbage dump to name a few obvious sites. An independent consultant will be chosen by NCN to conduct the ESA Phase 1 and we expect them to be in the community before snow fall to do site visits.

Committee and Citizens Voice their **Concerns and Questions**

During discussions, committee members, including D'Arcy Linklater and Bill Yetman, voiced concern about waterways and shorelines around lands impacted by water fluctuations and continual erosion. Elder Rodney Spence suggested regulations must be stricter when dealing with third-party businesses to ensure land and water won't be contaminated.

Many were in agreement that NCN is in a better position to manage our own Lands now than in the past, having learned as we move forward. The Land Code will ensure stricter land and environmental laws will be in place to properly steward NCN lands for future generations, where the *Indian Act* is silent on this. For example: NCN can establish an environmental

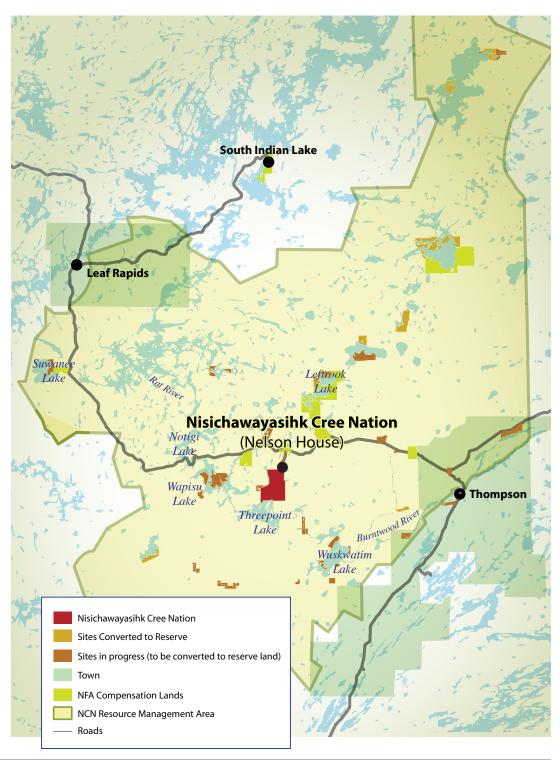

protection or assessment law to guide a proposed development taking place on reserve lands.

Working Toward a Land Code **Ratification Vote**

Land Code development is generally a two-year process and includes the drafting of a land code by a development committee; negotiating an individual transfer agreement with Canada; and successfully passing a community ratification vote on these two documents. The NCN Land Code Development Committee expects this vote to occur in May 2017. After the Land Code is ratified, NCN will have up to 140,000 acres of land to manage, including IR 170 (main reserve), and will have to develop our land and environmental laws to govern our reserve

lands. The Land Code **Development Committee** will explore the use of electronic voting (E-Vote) as a tool to encourage more members to vote traditional polling stations and mail outs will continue to be a method of voting.

Once NCN has ratified its Land Code, 34 sections of the Indian Act will no longer apply to our reserve land and Indigenous and Northern Affairs Canada

(INAC) will no longer have admin and control over NCN land. We will manage and administer our reserve land independently under our own Land Code and subsequent Land/Environmental Laws. Advantages of a Land Code include the ability to manage and govern lands to our own best interests, the ability to speed up economic development on NCN lands, and to create leasehold interest on reserve, all without the complications of the *Indian Act*.

We encourage members to provide your emails addresses to the Lands Coordinator Jeremiah Spence at jeremiahspence@hotmail.com so we can provide ongoing information and also for the purpose of the E-vote tool for those that wish to cast your vote using this method.

Building on Past Success and Knowledge

Leah Bitternose from the Land Advisory Board Resource Center (LABRC) shared some success stories from other First Nations who have ratified their own Land Codes. She outlined there are several success stories from other First Nations that have created their own Land Codes. They are most satisfied by economic benefits that include an increase in not only the quantity of jobs, but also the quality. They have also seen better lease terms and better relationships with non-First Nation organizations, including financial institutions.

The Whitecap Dakota First Nation in Saskatchewan has seen a decrease in unemployment and the creation of 700 jobs. T'Sou-Ke First Nation in British Columbia is enjoying energy and economic self-sufficiency. In the same province, Westbank First Nation has seen its Gross Domestic Product explode from \$100 to \$500 million.

Making Sure NCN Citizens are Well Informed

Chief and Council, the Land Code committee members and Lands staff want to ensure all Citizens are well informed throughout the land code development process and assure Citizens that NCN is well equipped to effectively manage its own Land under a Land Code. "We are optimistic our community will reap many rewards once the process is complete," said Chief Moody.

We encourage Citizens to provide your email to the Land Code Coordinator for ongoing information about the land code. We also ask citizens to contact the Lands office to share any environmental contaminated sites you may remember or be aware of. For further information about the NCN Land Code, please contact:

National Day of Remembrance for Missing and Murdered Indigenous Women and Girls, October 4, 2016

On October 4, 2016 gatherings in many communities are taking place across Canada to honour our Sisters who voices have been silenced. In Nisichiwayasihk Cree Nation (NCN) we have been impacted by this National tragedy – along with the surrounding areas – several women have gone missing or have lost their lives to violence. On this day we ask that you stand to honour the many women who have lost their lives to violence and those whom remain missing. Ending violence against Indigenous women and girls and transgender women is

a priority for the Women of Heart and NCN. Advocates encourage all communities and Indigenous Citizens to tell their stories and seek support, and make the pledge to end violence.

In respect, Hilda Anderson-Pyrz, Founder, Women of Heart

Congratulations **NNOC 2016 Graduates**

On behalf of all or NCN Citizens, School Staff and Chief and Council, we are proud of your success!

10 Quick Steps to Winterize Your Home

To prepare your property for snow, cold, and bitter weather, start now and begin these home safety chores:

Check your plumbing - Make sure that your

plumbing isn't vulnerable to the cycles of freezing and thawing that can cause pipes to burst. Shut off the supply of water to outdoor tapsand sprinklers and drain them. Also cover the outdoor components

of your air conditioner. Insulate any pipes that may be close to exterior or outdoor walls and may be prone to freezing.

■ Seal leaks and save on heating – Check your roof for loose or missing shingles and gaps around your chimney, flues, and other openings and do the same for your home's exterior. Be especially watchful of the areas around windows, doors, and your foundation for cracks. Once you identify areas where water might intrude or ice could form, address these problems. Caulk cracks or install weather stripping where appropriate.

■ Check out your chimney – If you plan to use your fireplace or wood stove this winter, make sure your chimney is clean and no critters have made themselves at home there.

Inspect your chimney and clean out soot and other hazardous debris.

- Watch for mould Mould can trigger asthma attacks, and cause problems for people with compromised immune systems. Mould needs water in order to grow so find where there are damp areas. When showering, use your bathroom fan, if vented to the outside.
- Check and change furnace filter Replace or clean furnace filters monthly during the heating season. Dirty filters restrict airflow and increase energy
- Turn down water heater temperatures Lowering the temperature to 120 degrees Fahrenheit (or lower) from 140 would reduce your water heating.
- **Set the thermostat** Setting a programmable thermostat to keep a steady heat in the winter and cooler sleeping temperature can be very helpful. Turning down the heat slightly if no one is home in the day can save on heating.

Put some plastic on windows

 Consider stopping those drafts by installing window insulation kits around windows.

■ Smoke detectors – Be sure to check the batteries and make sure all smoke and carbon monoxide detectors are working properly. It is also a good time to check fire extinguishers or get one if you don't have already.

■ Check your heating and furnace – Make sure the heating, furnace, vents and ducts are all working and ensure clean airflow.

Footprint Lake Water Levels

Footprint Lake 60-Day Water Level Forecast

Revised Forecast September 1 – October 31, 2016

On September 1, 2016 the level of Footprint Lake is forecasted to be 798.6 feet. The level of the lake is expected to fall 10 inches to an elevation of 797.8 feet by the end of September.

During the month of October the level of the lake is expected to fall 1 inch to an elevation of 797.7 feet by the third week of the month and remain fairly constant near elevation 797.7 feet until the end of October.
