

Diagnostic Support Worker Applied Certificate

Program Overview

February 2023

Diagnostic Support Worker Applied Certificate Program Overview

The Red River College Polytechnic Diagnostic Support Worker (DSW) program prepares students to practice diagnostic support skills as knowledgeable, competent and caring health care professionals. The DSW program is an applied certificate program designed to enhance the accessibility to health care services for remote communities. Focused in community, students are provided with the opportunity to learn and practice clinical skills close to home.

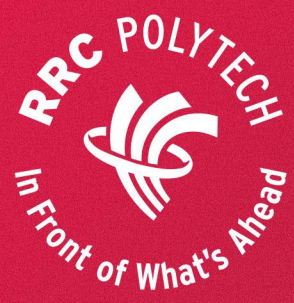

The program is comprised of four micro-credentials courses:

- Academic Foundations
- EKG
- Phlebotomy
- Radiographic Procedures

Students will earn a digital badge for completing each micro-credential course and the DSW applied certificate for completing all four micro-credential courses. The total program spans 3 terms, and 46 weeks of study.

Term 1 Courses	Term 1 Duration: 15 Weeks	Instructor
